

## Gulf Steel Industries Co. Ltd.

### Traceability Statement

The raw material billets used by Gulf steel are traceable back through our Unique “**Cast Number**” as indicated on the mill test certificate, Product Label and Dynamic QR Code shown on the Label. Further traceability of raw materials for billet manufacturing is not possible to be traced.

**\*Justification:** All billet suppliers purchase their raw material (Scrap) from their suppliers and accumulate at same place. During their production they randomly use their raw material based on their convenience and its impossible to trace which scrap is used for production.
